

About Us

=====

LAFZ Technologies is a software solutions and services providing company which is built around its watchwords - "Gateway to Great Solutions". Here at LAFZ, we believe and act upon our watchwords very seriously and you will notice that it will reflect in all realms of our work.

Nowadays, technology has become like a labyrinth with different tools, platforms, languages, APIs, frameworks and libraries in galore. Therefore, it's difficult for businesses to adopt the right combination of technologies. We will fully assist you in navigating through this labyrinth by delivering a wide range of stable, secure and scalable solutions and services including Network Solutions, Cloud Services, Testing Services, Web Solutions, Documentation and Mobile Solutions.

Mission

=====

LAFZ is an acronym of "Launch and Achieve your Favourable Outcomes with Zeal". As the name implies, our mission is to help our customers so that they can start with their own desired choice of service(s) and attain the best possible outcomes plus competitive advantages in conjunction with great enthusiasm.

Vision:

=====

To be amongst the top software solutions and services providing companies in the world.

Core Values:

=====

Our values are based on four C's:

i) **Customer-First:** We adhere to this customer service phrase that "Customer is the King" and give high priority to the matters of our customers

ii) **Creativity:** Our solutions and services have always been a stroke of genius in terms of tools and technologies

iii) **Competency:** Our dedicated team continually increase their repertoire of technical skills which are required to build smart and cost-effective solutions

iv) **Cooperation:** We collaborate with our customers to full extent and beyond their expectations

The Story of LAFZ:

=====

The story of Lafz takes inspiration from the fact that "A single honey bee tap two hundred flowers in order to produce a single drop of honey" which means the sweetest reward always comes from the hardest struggle. For us the honey bee and honey metaphor defines our diligent approach coupled with usage of cutting-edge technologies towards work.

For our customers, we do extensive research and go to extra mile in order to deliver them robust solutions and services and ensure their success by balancing cost, speed and quality at the same time.
